Container:

The screenshot shows the Docker Desktop interface. The left sidebar contains navigation options: Containers, Images, Volumes, Builds, Docker Scout, and Extensions. The main area is titled 'Containers' and displays a table of running containers. Above the table, it shows 'Container CPU usage' at 360.04% / 400% (4 CPUs available) and 'Container memory usage' at 1.24GB / 11.37GB. A search bar and a toggle for 'Only show running containers' are also present. The table lists 12 containers, including 'compose', 'rabbit-server', 'EUREKA-SERVER', 'MONGO-SERVER', 'imposto-service-1', 'fabricante-service-1', 'carro-service-1', 'mongo-express-1', 'notafiscal-worker-1', 'pedido-service-1', 'gateway-1', and 'notafiscal-1'. Each row includes a checkbox, the container name, image, status, port(s), CPU usage, last started time, and actions (stop, restart, delete).

	Name	Image	Status	Port(s)	CPU (%)	Last started	Actions
<input type="checkbox"/>	compose		Running (11/11)		369.48%	32 seconds ago	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<input type="checkbox"/>	rabbit-server 66c3acd947b0	rabbitmq:3-management	Running	15672:15672 Show all ports (2)	37.06%	37 seconds ago	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
